

# Siddhant Vinchurkar

»»» ANDROID AND WEB DEVELOPER

## PERSONAL SUMMARY

Passionate freelance developer with over 3 years of experience in developing android and web applications. Can build Progressive Web Apps as well as native android applications.

## SKILLS/ABILITIES

- Proficient in 7 programming / scripting languages (C, C++, Java, JavaScript, NodeJS, PHP and SQL).
- Intermediate in 4 scripting languages (C#, Python, Bash and Google Script).
- Well versed in HTML5 and CSS3.
- Learning Ruby, Kotlin and Go, Photoshop, Blender and Unity3D.
- Fluent in 4 spoken languages (English, Hindi, Marathi and Kannada).

## TOOLS/FRAMEWORKS

- Comfortable with version control systems (primarily git) and CI/CD systems (Travis CI as well as a custom service I built).
- Familiar with modern UI/UX design principles (Have used material design in most projects so far) and frameworks (such as Angular, Materialize and Bootstrap)
- Proficient at making use of modern, real time NoSQL databases, microservices, storage buckets and remote compute instances through RESTful APIs (Have used services from AWS, GCP and Digital Ocean but primarily Google's Firebase) to host and distribute content as well as automate internal processes.
- Familiar with application development cycles and the Google Play Developer Console (Have published over 10 apps in the Play Store).

## ACADEMIC BACKGROUND

### St. Joseph's College (Autonomous), Bengaluru

Bachelor's degree in Computer Applications | Graduated in 2019

- Volunteered for several activities of "Cybernetics Computer Club".
- Finalist at the #UnitedByHCL Hackathon in Manchester, United Kingdom.

Recipient of the 2018 Google India Challenge Scholarship

### Spark, Pune

Diploma in Android Development | Graduated in 2016 with A+ Grade

### Capitol Public School, Bengaluru

12th Grade | Graduated in 2015 with 71% score.  
10th Grade | Graduated in 2013 with a 9.4 GPA.

## RELEVANT EXPERIENCE

### Chhota Bheem Kids Carnival

Web and android developer | October 2019 - November 2019

- Worked with core event management team to design a progressive web app that allowed users to purchase event tickets online.
- Also built an android app to scan customer QR codes and profile the user based on the data collected.

### India Plog Run

Web Developer and Location Handler | July 2019 - October 2019

- Worked with the core event management team to build a large data set of tracks for people to follow across 50 cities in India and a progressive web app to manage and track all maps.

<https://indiaplog.run/>

### Matchday Sports

Web Developer | November 2018 - December 2018

- Built a responsive landing page with content that can be updated instantly by editing a Google Sheet.

### Bengaluru Plog Run

Web Developer | August 2018 - October 2018

- Worked closely with the core event management team to build a landing page and an admin console to track over 7000 event registrations.

<https://bengaluru.plog.run/>

### Survival Of The Fittest

Web and Android Developer | July 2017 - July 2019

- Built two progressive web apps (admin console and landing page) and two android apps (for coaches/employees and for clients) to help automate most business processes such as scheduling classes, marking attendance and managing payments.

### Onyx AI

Web and Android Developer | March 2017 - September 2017

- Onyx is an artificially intelligent assistive chatbot that can help you place orders with DHL or have a simple conversation. It is designed to automate customer service at the lowest level and leverages the use of AI, NLP and a cross-platform presence through Google's Dialogflow.
